

FORMAT FOR 2023 ENGINEER OF THE YEAR LONG RESUMES

Submit the resume in precisely the required format for length, font, and margins. Up to 10 points are available for following the requested resume format. The standardized format is designed to foster equal judging and the fair evaluation of all candidates.

- Maximum length: 5 single-spaced, typewritten pages
- Font: Arial 10 point, with modest use of **bold** and *italics*.
- Margins: 1 inch on top, bottom, and both sides; headers permitted within 1 inch border.

Information to include in resume:

Candidate Personal Information

- Name
- Current address, home and work phone numbers, fax number, and e-mail address
- Date and place of birth

Engineering Experience

- Comprehensive history of engineering experience during 2023 and 2024
 - List all engineering contributions: specific projects, locations, employers, and titles/positions held, highlighting significant contributions
- Significant engineering experience prior to 2023
 - List significant engineering contributions: specific projects, locations, employers, and titles/positions held

Engineering Publications

- Comprehensive list of engineering publications during 2023 and 2024
 - List all publications, magazine articles, conference/symposium presentations and patents completed in 2023 and 2024. Include titles, dates, and a brief description of the published technical articles and papers.
 - Reports and papers that were required in the normal course of the individual's work responsibilities may be mentioned under Engineering Experience, but do not satisfy the Engineering Publications criteria unless the reports or papers were later presented orally in a conference/symposium or published in a periodical, journal, etc.
 - More points will generally be given based on the prestige of the venue (nationally circulated and peer reviewed publications have more weight over local publications or non-peer reviewed articles).
- Significant engineering publications, magazine articles, conference/symposium presentations and patents completed prior to 2023

Professional Organization Membership and Activity

- List all memberships in professional organizations, offices held, and activity in the organization

Extra-curricular Professional Service

- List all are activities that involve engineering skills and knowledge, but are not a part of your job nor activities for your engineering society. Examples include boards and commissions, E-Week activities, etc.

Non-Profit Community Service

- List all community service activities outside your professional and business activities. Active participation in non-profit/service organizations should be emphasized. Passive memberships may be listed if noted accordingly.

Education and Continuing Education

- List education and degree(s) granted
- List continuing education – educational achievements after entry into engineering profession

Professional Honors and Certificates

- List all professional honors and certificates
