

DISCOVER E CLASSROOM SPEAKERS

Dear Teachers,

National Engineers Week (E-Week) is rapidly approaching – February 18-24, 2024.

What is E-Week?

E-Week is an annual event to bring public attention to the work and contributions of our nation's engineers. Anchorage's E-Week is filled with many exciting activities for adults and kids.

Help Your Students "Discover E"

Discover E engineers share a common desire: to help local students discover the exciting worlds of engineering and technology. Their goal is to relate practical applications of math, science, and engineering to the world around them.

Schedule a "Discover E" Engineer to Speak in Your Classroom

As part of Anchorage's E-Week activities, local engineers are available to speak to classrooms from February 12-16. These enthusiastic speakers can talk to your students about engineering and how it relates to math, science, and other fields. The goal of the "Discover E" program is to spread awareness among students of how engineers impact our daily lives.

In a typical year, more than 40 volunteer speakers give over 50 presentations, reaching over 1,500 students.

We hope you will take the opportunity to open your classroom to a local engineer. If you would like an engineer to speak to one of your classes, please submit the form on the other side of this flyer via e-mail to Catelynn Hettick at catelynn.hettick@coffman.com.

Please respond by January 26th to ensure that we can identify a speaker for your class.

We encourage you to specify a topic or make other specific requests. Once we have matched you with an engineer, we will provide you with his or her contact information so that you can work out the logistics.

Questions?

If you have questions, please contact Catelynn Hettick at catelynn.hettick@coffman.com (907.257.9214) We look forward to opening the essential and exciting world of engineering to your students.

The Anchorage School District does not endorse these materials or the viewpoints expressed in them.
